

47a) $\int_{0,75}^{1,05} k dk = 1$ $k \cdot (1,05 - 0,75) = 1 \rightarrow k \cdot 0,2 = 1 \rightarrow k = 5$

d) $P(x > 1) = 1 - 0,75 = 0,25$
 $200 \cdot 0,25 = 50$ embalagem

b) $\text{media} = \frac{a+b}{2} = \frac{0,75 + 1,05}{2} = 0,95$
 $\text{variância} = \frac{(b-a)^2}{12} = \frac{(0,20)^2}{12} = 0,0033$

c) $P = \frac{1 - 0,75}{1,05 - 0,75} = \frac{0,25}{0,2} = 0,75$
